Subdivided is a new hyper-survival open world game where you play as a coyote caught in a vicious cycle of suburban encroachment and vanishing natural food. Your only option is to venture ever-further into human territory and take on ever-more dangerous dangers. Play in an open world with no loading screen segments and no linear objectives. Choose how to complete your missions: Stealth your way through, fight with bullets, learn new techniques, be a silent assassin or try whatever you want - it's all about what works for you! Use what you've learned to take on missions as you see fit! Replay missions at any time and complete them however you like - if you've just spent most of your time hiding in bushes, then by all means, go in hard and fight from the get go, but if you've been working on your stealth skills in the shadows, then feel free to deploy them when the time is right. We don't enforce any sort of "timetable" so choose how you play, but rest assured, if you're not playing how you want, it might affect your progress. Subdivided features: - Huge open world - hundreds of miles to explore - Open world exploration - no loading screen segments - Fully configurable open world - make your own game - No set content; enable what content you wish to see - Skill-based mission system - complete missions according to your style - 6 main skills: Stealth, Agility, Agility with tactics, Agility with surgical strikes,

Melee, and Throwing. Each skill has 20 sub-skills and 6 unique talents for each - combat style is endless - Over 20 deadly weapons and more coming - Human NPC enemies - Multiple routes to accomplish missions - Strong storytelling with carefully crafted immersive audio - A massive world to explore and master. You can even die and it will carry on. Progress from your last save file - no checkpoints or loading screens - Endlessly replayable - Survival - how long can you last? - Diverse environments - everything from alleyways to the suburbs - Monochrome graphics with ambient sounds and atmospheric music - Atmospheric and cinematic audio effects - Display all stats on your HUD - Learn more about the world and your skills as you play and improve Hello Today I'll show you how to create some of those nice effect you can see in these 2D games in Unity3D. We are going to recreate the scene

Game "Spirit of Midnight" Features: Game "Spirit of Midnight" Screenshots: Spirit of Midnight - NEWS: Updated the game with the Forest map and also some minor fixes. First of all, thank you very much to all of you who have supported the project. AND NUTSHELL, the currently most downloaded app in the GOG store is the first game to reach 100,000 ratings! The sequel to this was a success, but I see a lot of complaints from some of the users who played the game. This time I went out of my comfort zone and made a completely different and stranger experience. I'm not saying that I'm finished with the series, but the title says it all. NOTE: This is a different game, and not the sequel to Nutshell! Thanks again, Greetings, I'm a veteran in the video game industry, with more than 30 years of experience. I have lots of experience in both programming and game design, and in that time I have created more than 25 games for the PC (and several games for different platforms too). I've also worked for many years as a concept artist, and worked on illustrations for books, magazines, posters, websites, and other projects. I studied Computer Science at the University of Amsterdam in Holland, and after getting my degree I moved to the United States to pursue game design. The past 17 years have been in the game industry. I have worked for Sony, Microsoft, Take2, Namco, Bethesda, Interplay, Parallax Software and many other small game companies. I have developed a variety of games including platformers, RPGs, space combat games, mech games, puzzle games, and so on. I'm currently developing my own game studio, De Razzi Productions. We are a small indie studio located in the West Coast of the United States. For the past eight years we've been creating games for consoles, phones and tablets. You can look me up on LinkedIn if you want. I'm also active on Facebook, Twitter and Instagram. My goals for this game: 1. Make something new and different. Something that you won't find on any other game website. 2. Something that's actually fun to play. 3. Music that makes you feel the game. 4. Graphics that make you feel like you're seeing a movie in a book.

What's new in Blue Max: Aces Of The Great War:

Committed to the Ninja-esque nigh is a brand new challenge. A challenge that will test the creators beating their limits. With help from the developers at CG art, we are relishing in providing you, the creator, with access to unprecedented amounts of data and options via Fantasy Newgrounds' massive new engine, SegaNet. This time, the city will be Tokyo and the challenge will be monsters. World of Monsters joins Fantasy Newgrounds as the first challenge with this unique selection of new Newgrounds mechanics that promise to create an additional "Endless Reactivity" of monster behaviors and rewards. What does this mean? Let's look at the new concepts of the engine: #1. Huge City, Huge World. Here is an old news. Developers always want more physics and bigger cities. So we are delivering. With the new Fantasy engine, the gigantic newworld features #2. Infinite We are delivering surreal new concepts to the following categories: - Surveillance Camera - Museum - Hero - Arcade - Battleship - Trendy hookah cafes #3. Over 100 elements We are creating a huge universe for you, the play creator, so your monsters will come out with a fierce life of their own. Thanks to the sheer amount of variables that we are able to work with, you will be crafting magic with life. You will create a universe between a nightmarish nightmare and a potent and vibrant fantasy. We want to expand the amount of data sent to you, creators, so use these new elements on top of existing ones. The following will be sent to you monthly. New elements are added: - Colors, cells, squares, rectangles - Colors, shapes, details, skin - Textures, cell, row, color, shape, sizes - Hats, pastel colors, dots, spots, auras, etc. - Styles, brain, eyes, fur, scar, gauges, muscle, traits, etc. - Mini city, animals, creeping, shadows #4. Monster-exclusive events, customize and place Creating a monster is an art. However, managing a monster is also difficult. Through events, we are able to give you a power-up and new rewards to use in your creation. If the custom shapes are good,

Fight zombies and stay alive in this unique puzzle platformer by Ciri, the award-winning creator of the game "The Legend of Grimrock". Ciri is a young girl who has recently arrived at her destination, a secluded human colony, which is isolated from the outside world and owned by a company called Fiorentina. There she must defend the colony against the hordes of zombie-like creatures which appear from the outside world and attack the colony. Ciri will have to explore the colony, find weapons, tools and other useful items, help people in need, solve puzzles, fix machines and much more. In order to fight the zombies Ciri will have to use a variety of weapons and items which she will be able to find in the colony. Ciri will be able to use the objects that she finds to light the darkness and see further in the rooms she is exploring. Besides the challenges she will have to face there is a story to be uncovered about Ciri and the events leading to her arrival at the colony. To help her in her quest of survival Ciri will have three small pets with her. Ciri
